

**Scenario:**

You are a father/mother of a newborn child. You find yourself constantly needing to run to the grocery store in order to buy supplies for your little one, but due to COVID-19, the store's guidelines require you to wear a face covering, and you also want to avoid getting sick anyways to keep your child safe. You download Mask Filter Pro to find a good mask for you and possibly your wife to wear.

**Task 1:** Order a mask with comfort in mind from Amazon.

**Task 2:** Order a mask for you and your significant other with protection in mind from Target.

**Task 3:** Log in to My Rewards® and use your points to redeem 25% off your next mask, before purchasing one of your own liking.

**Notes**

What changes should I make to my application? (min. 3 Things):

- Be able to click different mask types from the side choices.
- Better art design
- Better MyRewards pull up tab

What changes should I keep the same for my application? (min. 3 Things):

- Different options for stores
- Keep lots of filters
- Navigation
